

DOG-ON-IT PARKS

DOG-ON-IT-PARKS.COM

The Dog Watering Station features all stainless steel construction and ADA compliant push button operation requiring less than 5 pounds of force to operate. The dog bowl has a slow drain of 30-60 seconds, allowing the dog to quench its thirst while helping to prevent unsafe standing water. The unit operates on water pressure range of 20-105 psig, and the standard finish is an attractive satin stainless steel with 18 powder coat color options available as well.
